Office Action Summary

Application No.

09/242,485

Applicant(s)

SHINTANI, PETER

Examiner

Hunter B. Lonsberry

Art Unit

2611

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 15 November 1999 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
- a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,915,243 to Smolen in view of U.S. Patent 5,227,874 to Von Kohorn and U.S. Patent 5,902,983 to Crevelt.

Regarding claim 1, Smolen discloses in Figure 1, a STB 101 which enables a user to take part in a survey, a user answers question and their responses are stored, in exchange for their responses a number of coupons or promotions are offered to the user (column 4, lines 6-18, column 5, line 1-column 6, line 57). Smolen does not disclose allocating points once the program is viewed in its entirety or storing points on a smartcard. Von Kohorn discloses a survey system, which awards a user points/coupons once they have fully completed a survey on a survey device (column 107, line 29-column 108, line 17). Crevelt discloses a smart card, which is utilized to track a player playing habits within a casino and provide playing rewards (column 9, line 1-column 10, line 14). Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen to allocate points once a survey has been completed as taught by Von Kohorn, and storing user information and rewards information on a portable smartcard as taught by Crevelt, thus insuring that a user

Art Unit: 2611

would complete a survey instead of providing incomplete data and enabling a user to use their smartcard at any device.

Regarding claims 2 and 7, Smolen discloses that the user device is a STB 101, which tunes to a broadcast signal from broadcast system 120 (column 4, lines 6-19). Smolen does not disclose response program determining means to determine whether or not the received programming is a response program. The examiner takes official notice that the use of a program attribute to determine the type of programming is well known in the art. Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen/Von Kohorn/Crevelt to include a program attribute, which identifies the type of programming; thereby enabling a set top box to discern between broadcast video programming and a survey or questionnaire.

Regarding claims 3 and 4, Smolen discloses that the user responses are stored locally and then transmitted to a processing facility 130 (column 7, lines 26-37).

Regarding claim 6, Smolen discloses in Figure 1, a STB 101 which enables a user to take part in a survey, a user answers question and their responses are stored, in exchange for their responses a number of coupons or promotions are offered to the user (column 4, lines 6-18, column 5, line 1-column 6, line 57), user responses are stored locally and then transmitted to a processing facility 130 (column 7, lines 26-37). Smolen does not disclose allocating points once the program is viewed in its entirety or using a smartcard to store points information. Von Kohorn discloses a survey system, which awards a user points/coupons once they have fully completed a survey on a survey device (column 107, line 29-column 108, line 17). Crevelt discloses a smart card,

Art Unit: 2611

which is utilized to track a player playing habits within a casino and provide playing rewards (column 9, line 1-column 10, line 14). Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen to allocate points once a survey has been completed as taught by Von Kohorn, and storing user information and rewards information on a portable smartcard as taught by Crevelt, thus insuring that a user would complete a survey instead of providing incomplete data and enabling a user to use their smartcard at any device.

Regarding claims 8 and 9, Smolen discloses in Figure 1, a STB 101 that tunes to a broadcast signal from broadcast system 120 and enables a user to take part in a survey, a user answers question and their responses are stored, in exchange for their responses a number of coupons or promotions are offered to the user (column 4, lines 6-18, column 5, line 1-column 6, line 57), user responses are stored locally and then transmitted to a processing facility 130 (column 7, lines 26-37). Smolen does not disclose allocating points once the program is viewed in its entirety or storing points information on a smartcard. Von Kohorn discloses a survey system, which awards a user points/coupons once they have fully completed a survey on a survey device (column 107, line 29-column 108, line 17). Crevelt discloses a smart card, which is utilized to track a player playing habits within a casino and provide playing rewards (column 9, line 1-column 10, line 14). Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen to allocate points once a survey has been completed as taught by Von Kohorn, and storing user information and rewards information on a portable smartcard as taught by Crevelt, thus insuring that a

Art Unit: 2611

user would complete a survey instead of providing incomplete data and enabling a user to use their smartcard at any device.

Regarding claims 10 and 11, Smolen discloses in Figure 1, a STB 101 that tunes to a broadcast signal from broadcast system 120 and enables a user to take part in a survey, a user answers question and their responses are stored, in exchange for their responses a number of coupons or promotions are offered to the user (column 4, lines 6-18, column 5, line 1-column 6, line 57), user responses are stored locally and then transmitted to a processing facility 130 (column 7, lines 26-37). Smolen does not disclose allocating points once the program is viewed in its entirety or utilizing a smartcard to store points. Von Kohorn discloses a survey system, which awards a user points/coupons once they have fully completed a survey on a survey device (column 107, line 29-column 108, line 17). Crevelt discloses a smart card, which is utilized to track a player playing habits within a casino and provide playing rewards (column 9, line 1-column 10, line 14). Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen to allocate points once a survey has been completed as taught by Von Kohorn, and storing user information and rewards information on a portable smartcard as taught by Crevelt, thus insuring that a user would complete a survey instead of providing incomplete data and enabling a user to use their smartcard at any device.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,915,243 to Smolen in view of U.S. Patent 5,227,874 to Von Kohorn and U.S.

Art Unit: 2611

Patent 5,902,983 to Crevelt in further view of U.S. Patent 5,855,008 to Goldhaber and U.S. Patent 5,270,809 to Gammie.

Regarding claim 5, Smolen discloses in Figure 1, a STB 101 which enables a user to take part in a survey, a user answers question and their responses are stored, in exchange for their responses a number of coupons or promotions are offered to the user (column 4, lines 6-18, column 5, line 1-column 6, line 57). Smolen does not disclose a pay program determination means and processing means for performing accounting to points stored in the recording means. Goldhaber discloses an attention brokerage system, which provides user's credits for viewing advertising; these credits are stored in a consumer computer repository (column 9, line 53-column 11, line 45). Gammie discloses a pay per view system in which credits are downloaded to a set top box and utilized to purchase Pay Per View programming. The examiner takes official notice that the use of a program attribute to determine the type of programming is well known in the art. Therefore, it would have been obvious to one skilled in the art at the time of invention to modify Smolen/Von Kohorn/Crevelt to issue credits as taught by Goldhaber and to use the stored credits to purchase pay per view programming as taught by Gammie and to utilize a programming identifier thereby enabling a user to trade their survey responses to view pay programming.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 6,256,614 to Wecker: Internet System for Producing Electronic Reward Cards.

U.S. Patent 6,057,872 to Candelore: Digital Coupons for Pay Televisions.

U.S. Patent 5,838,314 to Neel: Digital Video Services System with Optional Interactive Advertisement Capabilities.

U.S. Patent 6,012,039 to Hoffman: Tokenless Biometric Electronic Rewards System.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hunter B. Lonsberry whose telephone number is 703-305-3234. The examiner can normally be reached on Monday-Friday during normal business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Faile can be reached on 703-305-4380. The fax phone number for the organization where this application or proceeding is assigned is 703-308-5359.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
